

Minerva Portable High Pressure Case

MNR 300 - CAXP2

*AUTONOMOUS HIGH PRESSURE SUPPLY AND ADJUSTMENT SYSTEM
FOR CRYSTAL/AMETEK XP2i AND M1 SERIE DIGITAL PRESSURE GAUGES*

This case offers improved efficiency to quickly and safely perform clean, high pressure calibrations at your own location.

- Supports pressure ranges with full scale from 20 MPa down to 0.7 MPa in a single system
- Simple, compact and easy to operate
- Built-in refillable 28 MPa storage tanks for pressure supply
- Precise test pressure control using a pressure balanced volume controller
- Protected against overpressure
- Three analogue pressure gauges for monitoring pressure in storage system, regulated supply pressure and pressure at test ports
- Two test ports
- 316 SS high pressure tubing and fittings

Self contained unit provides pneumatic pressure for calibration and testing up to 250 bar using a CRYSTAL/AMETEK XP2i or M1 digital pressure gauge.

The unit is designed as an additional tool for your CRYSTAL/AMETEK XP2i and M1 series digital gauge allowing fast and safe generation of high pneumatic pressure up to max 25 MPa.

OPERATION

The built-in high pressure gas storage system is filled through the appropriate connection. Three separate monitor gauges are mounted to indicate storage system pressure, regulated pressure and pressure at test ports. The maximum test pressure is set using the supply regulator. The test pressure at the two test connections is precisely controlled by two fine metering needle valves and the pressure balanced volume adjuster.

The installed Crystal/Ametek digital pressure gauge displays the test pressure. Externally generated pressures can also be measured via the test connections. The instrument is supplied with quick-connect test and filling hose, a ¼" NPT male adaptor for the test connection and filling and a refill connector.

Quick reference guide for safety and ease of use

The Minerva MNR 90 precision volume adjuster allows very fine pressure control to within 100 Pa

The three pressure gauges indicate:
1. pressure in bottle
2. pressure set by pressure regulator
3. pressure at test port

Space to store extra pressure gauge

A high pressure swivel connection with quick connector allows the XP2i and M1 gauge to be connected and positioned at whichever angle is most convenient for the operator.

The Minerva MNR 180 pressure regulator is designed specifically for use in calibration and test applications
