## Temperature logger

## PicoVACQ Thermocouple

Measure temperature in your thermal processes up to 1300°C with an extra small thermocouple logger.

**PicoVACQ 1TH** is a cylindrical logger with one thermocouple channel. With its very small diameter, its measurement range up to 1300°C and its operating range up to 140°C, it is a solution specially designed for thermal processes requiring temperature measurement in industrial environment and quick response time.

A thermal shield adapted to the application can be used for temperatures beyond 140°C up to 1300°C.

Among the most common applications:

- Bottle depyrogenation in pharmaceutical industry.
- Internal and external varnish polymerization of aluminum bottles and sprays in packaging industry.
- All tube manufacturing processes in metal industry like pipe spinning, annealing, hot piercing, coating, etc...

## Metrology

**Technical** 

specifications

Software operating

conditions

MI-ORION

- Option 10 Hz available
  Operation range: From 0°C to 140°C
- Thermocouple measurement range: Type K up to 1300°C
- Resolution and noise: 16 bit converter, resolution : <±0.1 °C
- Calibration uncertainty: +/- 0.1°C from 0°C to 140°C
- External materials: 316 L stainless steel
  - Temperature sensors: Pt1000 for cold junction and internal temperature Thermocouple according to specifications
- Dimensions: Diameter: 15 mm Height: 105 mm
- Memory capacity: 32 500 acquisitions
- Programmable acquisition rate: minimum 1 second, maximum 59 minutes and 59 seconds.
- Programmable acquisition duration
- Programmable recording start by date, hour, minute.
- Battery replaceable by the user.
- Battery life: Varies with acquisition period and use conditions: 150 hours for a 5-second rate
- 80 hours for a 1-second rate
- Nonvolatile memory (EEPROM)
- Data transfer with a communication interface connected to the USB port.
- Operates in Windows® XP (SP3)/VISTA/7/8.
- TMI-ORION software (logger programming, registered data reading...)

## NOTA :

A yearly checkup with our after-sale department is recommended: replacement of water tightness O-rings, overall operating checkup, metrological adjustment.
